

S1000D Business Rules

WHAT IS IT ABOUT

This course teaches the basic of S1000D Business Rules and the main requirements for a successful S1000D implementation. Learn the technical and business aspects of Business Rules and how they can improve or impact your S1000D project and environment. Also learn about BREX data modules and future developments.

- Business Rules (BR) definition according to S1000D
- The difference between a Business Rule and a Schema/DTD definition
- Business Rules categories and layers
- Conflicting Business Rules
- Business Rules EXchange (BREX) data modules
- S1000D default BREX
- BREX layering issues
- Overview of BREX development since its beginning in Issue 2.2 until today
- Future developments in S1000D in respect to Business Rules in general and BREX in particular
- Hands-on on Business Rules and BREX

WHO IS IT FOR

All department and project managers as well as persons responsible for S1000D implementation into projects and organizations. Also for technical documentation planners and managers at project or organizational level, who are responsible for writing Business Rules.

PRELIMINARY REQUIREMENTS

Knowledge of basic S1000D concepts (DM, DMC, ICN, DDN, TP, CSDB, IETP, PM, DMRL, commenting, QA according to S1000D, etc.) as well as basic SGML/XML knowledge.

If these terms are unknown to you then visit our courses “S1000D - what is it about?” or “S1000D for managers”.

DURATION

2 days
